

The ARTPLASTICS Down Pipe System

The Art of Down Pipes

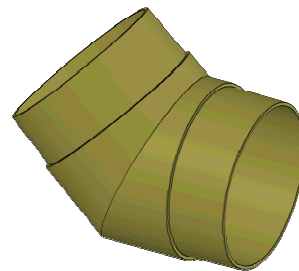

The Art Plastics Down Pipe System creates a timeless style in a modern maintenance free interpretation. The design features aesthetically pleasing falls and clean lines. The internal fitting of the tapered spigot achieves a 'flush fit' with the outside of the pipe giving the look of more expensive metal architectural down pipes.

*Classic
Down Pipes!*

A Cost Effective Solution

The moulded fittings save considerable time in installation compared with Metal and Copper alternatives. Made of corrosion resistant and lead free UPVC, it will provide a lifetime of trouble free reliability.
